e-PlanSoft™

One Solution For All REVIEW Purposes

✔ Design REVIEW
✔ Construcctability REVIEW
✔ Code Compliance REVIEW
✔ RFI REVIEW
✔ Shop Drawing REVIEW
✔ Value Engineering REVIEW
✔ Fire Protection REVIEW
✔ Construction Inspection

Enhanced Overlay & Versioning

Page Comparisons: Easily mark-up, identify, and track changes made from version to version with document overlay and side-by-side views.

Document Versioning: Ensure that you're always working on the newest version and that all comments and markups carry forward, while still retaining read-only access to earlier iterations for review.

Multipage Documents: Accept multipage PDFs for plan review and easily navigate through submitted documents, open multiple pages within the same document simultaneously, and stamp, or status an entire do cument in a single action.

Robust Comment Management with Comment Library and Threaded Comments

Secure Review Comments: Protect comments and sketches from unauthorized changes with our built-in security feature. Comments are saved directly to the database, instead of an unsecure text file or to the PDF document, so they are protected should the PDF file become uncompromised.

Powerful Comment Management: More robust comment access, organization, and reporting, and clients will have the ability to allow external team members to reply to the reviewer comments.

Enhanced "Real Time" Team Collaboration

Project Team Membership: Regulate access to project data for users within and outside of a given project team filter, allowing for increased control, flexibility, security, and appropriate access as needed.

Better Collaboration: Made easier and more secure with flexible permissions and concurrent plan review.

Assignment Distribution Tools: Set user-defined rules to automatically route incoming review assignments to team members.

More Flexible User Permissions: Configure standard permissions templates across multiple user role types. Users can also belong to one or as many groups/departments as needed.

Specialized Markup Tools

Markups Print Rendered by Department: Generate PDF deliverables that include markups and comments from either all or specically selected departments.

Industry Standard Markup Toolkit: Access to the most common renew features, including markup and secure stamping tools with a single click from the review page streamlined markup toolbar.

Partial Resubmittals

Slip Sheet and Sheet Numbering: Allow applicants to resubmit ONLY changed pages for a faster resubmittal review. ***As more files are submitted, AI improves OCR accuracy.*

REVIEWSession™

With e-PlanSoft's *goPost™ Public Portal* you can communicate securely with customers to receive and assign project files.

Provide Comment Access: Allow project owners, architects, engineers, or other parites of interest to view and/or reply to comments for selected projects.

Comment Conversations: Track comment conversation history between internal users and external collaborators.

Always Available: No need to schedule coordination or backcheck meetings between parties.
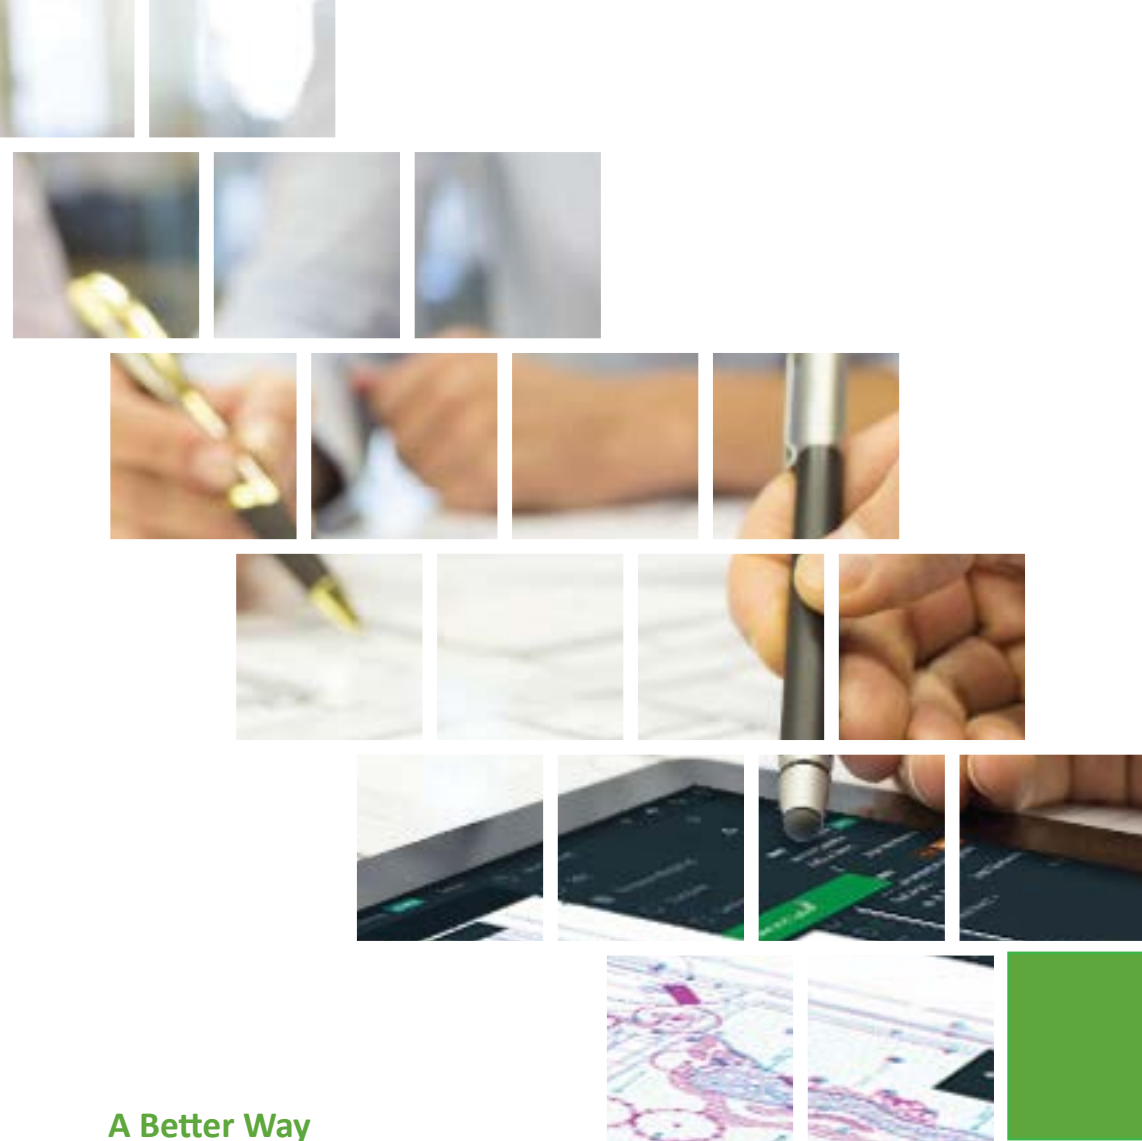

Integrated PDF Scout inspection tool flags and analyze incoming documents for compliance with defined minimum requirements.

Work without limits in real-time!
Whether at the office of on the field, access, markup, or collaborate on plan sets faster. Review from anywhere, anytime, and in real-time.

A Better Way

The e-PlanSoft suite of products were developed to provide practical solutions to both public and private sectors to streamline and improve efficiency and effectiveness in plan reviews. Our leading edge solutions do what you need them to do, because we've built them based on input from the professionals who use them. The following are some of the most popular features and functionality we provide today as a result of that input.

- User-defined assignment distribution tools
- Department specific markups
- Web services (API) toolkit & integration
- Deployment optimization
- Secure reviewer comments
- Standard comments library
- One-click corrections report
